

How to search the archives and files on the Yahoo!Groups Electronic Mailing List for ON DPG

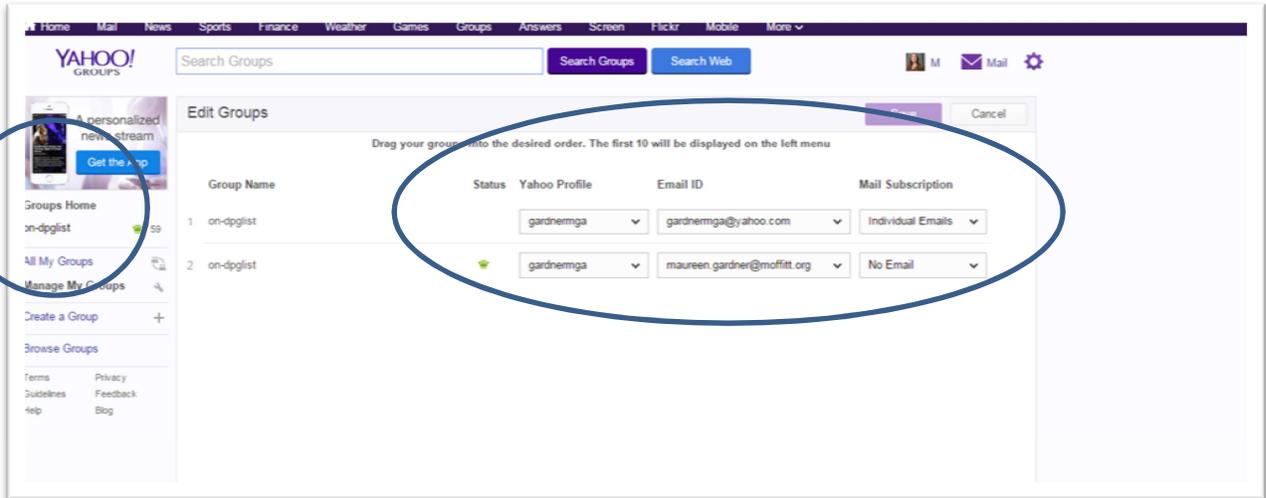

Go to yahoo website: www.yahoo.com

Sign in to yahoo with your yahoo email address.

You can create a yahoo email address on yahoo.com

You need to have a yahoo email address to sign in to yahoo groups and search the archives. You can set this email to 'no mail', daily digest or 'individual messages' as shown below. Remember your yahoo address and password - *it is a personal email account and ON DPG does not ever have access to this account or its password.*

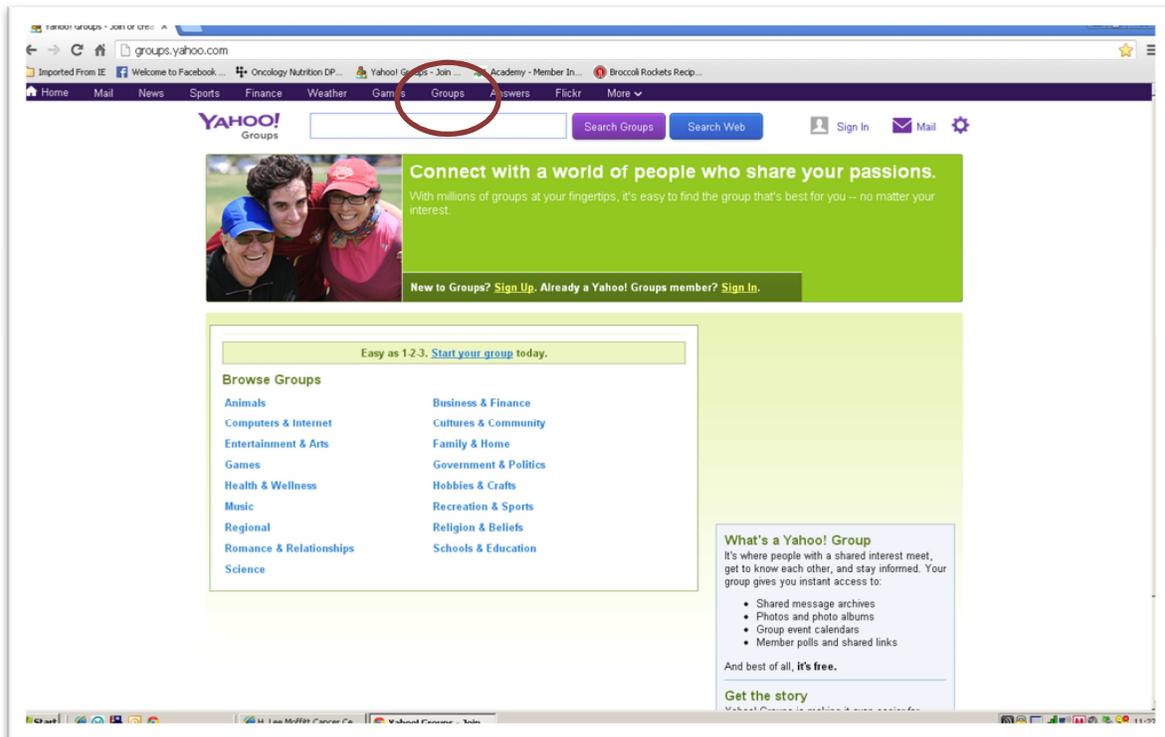

Now request to join with your yahoo email address - send an email to on-dpglist-subscribe@yahogroups.com you must send your FULL NAME (as listed in your academy profile at eatright.org) And ACADEMY NUMBER when requested.

Otherwise your request will not be approved because the group is limited to members of ON DPG.

This is an important step so make sure and check your yahoo email address once you request to subscribe.

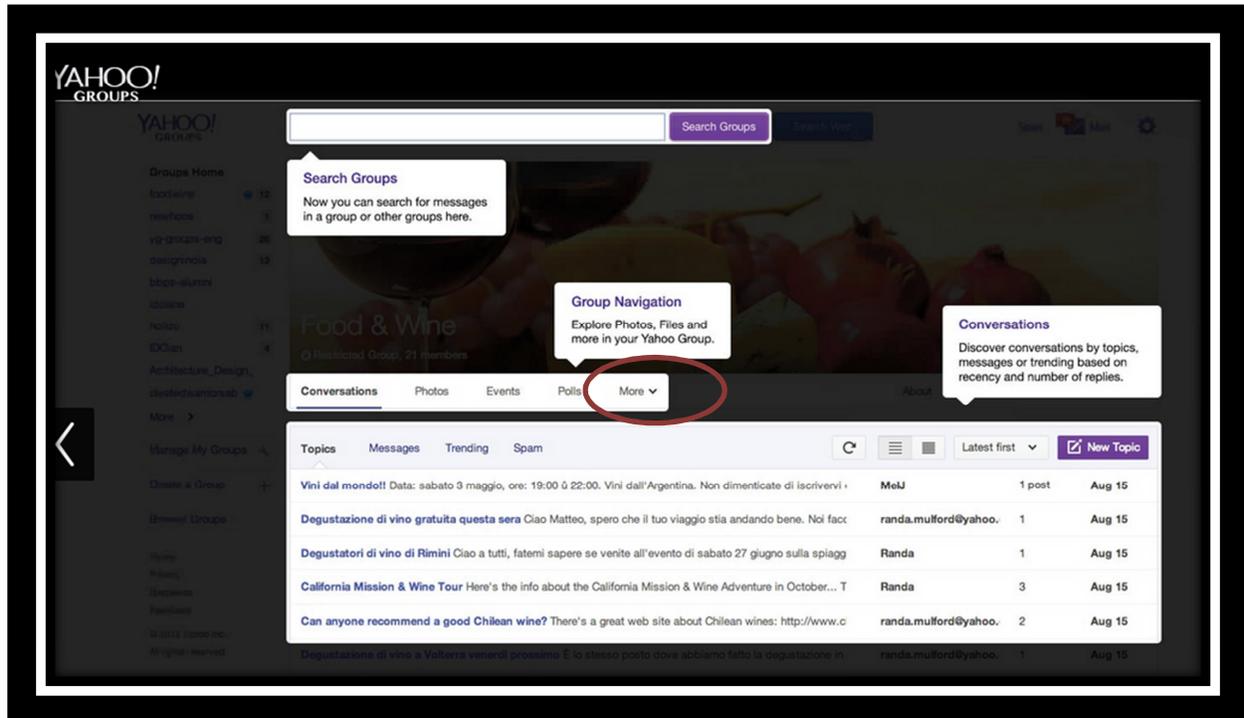

After you log in go to Groups- it's in the dark bar at the top.

After you log in you can search for topics or look at files.

At the top of the page where it says "Search groups" type in your words on top of where it says "Search conversations". "Search groups" really means "search group" Search with words, even partial words.

You can also search files as shown below under 'more'. (Circled in red.)

More instructions are on our website page
